Presentation of the LIFE AgriAdapt Project

Patrick Trötschler, Lake Constance Foundation

Project Methodology – Vulnerability Assessment at Farm Level

Sylvain Doublet, Solagro

Recommendations to Reduce the Farm Climate Vulnerability of European Agriculture

Southern Climate Zone: Vanessa Sánchez, Fundación Global Nature

Atlantic Climate Zone: Sylvain Doublet, Solagro

Continental Climate Zone: Carolina Wackerhagen, Lake Constance Foundation

Northern Climate Zone: Ragnar Leming, Estonian University of Life Sciences

Discussion: How & Under Which Conditions Could Adaptation Measures be Integrated into Agricultural Political Decisions/Policies?

Please register before the 16th of January 2019 by sending an email to:
carolina.wackerhagen@bodensee-stiftung.org with the subject “AgriAdapt EU Webinar”.

Project Information LIFE AgriAdapt

The overall objective of the AgriAdapt project is to demonstrate that three of the most important farming systems in the EU (livestock, arable and permanent crops) will become more climate-resilient through the implementation of feasible and sustainable adaptation measures which also have positive crosscutting environmental benefits. The feasibility of different sustainable adaptation measures will be tested on 120 pilot farms across the four Climate Risk Regions of Europe, and the conclusions obtained will be used to elaborate General proposals for key farming systems.

The specific objectives of the project are:

- to develop and test a common methodology to assess the vulnerability to climate change on 120 pilot farms
- to test sustainable measures and management approaches on 120 pilot farms
- to promote sustainable adaptation measures among farmers, farmers associations, technical consultants, food standard organisations and agricultural assurance companies
- to raise awareness and train current and future farmers on sustainable adaptation options at farm level
- to transfer best practices and know-how to political, agricultural and food business stakeholders and contribute to the development and implementation of EU, national and regional policies.

Project Partners

Bodensee-Stiftung (Lake Constance Foundation) – Project coordinator

Estonian University of Life Sciences (EMU)

Fundación Global Nature (FGN)

Solagro
